

SEO Growth Plan

Pricing:

\$500/month

For 3 months, no obligation.

Process:

Analyze Local Dental Keywords

We conduct in-depth research on how real patients search for dental services in your area. We combine search volume, patient intent, and local competition to ensure you're showing up for the keywords that actually bring in new patient calls and generate ROI.

Competitive Dental Landscape Analysis

We dig into what the top-ranking dental practices in your area are doing. We find gaps and opportunities, so your practice can outrank the competition.

Patient-Focused Site Analytics

We set up tracking tools to see how real patients interact with your site and Google Business Profile and get actionable insights.

Dental Content Strategy and Creation

Using our research, we create engaging, search-optimized content that speaks directly to your patients. Whether it's explaining emergency care or why your practice is best for Invisalign, we position you as the trusted dental expert in your area.

Local Dental Backlink Building

We build high-quality links from local healthcare directories, dental associations, and trusted area sources, proving to Google (and your patients) that you're the go-to dentist in your city.

Ongoing Growth and Patient-Focused Reporting

We continuously monitor your rankings and patient call data, sharing clear, dentist-friendly reports. This ensures you're not just getting traffic, but that you are getting more booked appointments and growing your practice for a ROI.
